

Biswash Devkota

biswashdevkota2023@gmail.com — 9844920320 — GitHub — LinkedIn

Summary

Final year Software Engineering student at Pokhara University with academic and project-based exposure to web development, machine learning, and cybersecurity. Interested in building practical solutions while continuously learning and improving technical skills.

Skills

Languages: Python, C++, JavaScript, Shell, TypeScript

Frameworks: React, Django, Node.js, Tailwind CSS

Tools: Git, Docker, GitHub Actions, Vim

OS: Kali Linux, Windows 11

Projects

Phishing URL Detector — github.com/rautepani/Phishing-URL-Detector

- Built a machine learning model to classify URLs as phishing or legitimate.
- Applied feature extraction from URL structure, domain age, and WHOIS data.
- Designed for real-world deployment with a clean prediction interface.

Hospital Appointment System — github.com/rautepani/Hospital_appointment

- Developed a full-stack web application for managing hospital appointments.
- Implemented patient registration, doctor scheduling, and booking workflows.
- Built with Django backend and a responsive frontend interface.

Password Generator — github.com/rautepani/password-GEN

- Created a secure password generator with customizable length and character sets.
- Focused on entropy and randomness to ensure strong password output.

Bandit OTW Writeups — github.com/rautepani/Bandit-OTW

- Documented solutions to OverTheWire Bandit cybersecurity challenges.
- Demonstrated practical knowledge of Linux, shell scripting, and security concepts.

Education

Pokhara University

Bachelor's in Software Engineering — Final Year (8th Semester)

Nepal

Shree Amarshing Model Secondary School

+2 Science

Certifications

Cloud and DevOps Technology

Certified Network Security Practitioner (CNSP)

The SecOps Group

SOC Level 1

TryHackMe
